PROFILE SUMMARY

Enthusiastic and motivated individual seeking to contribute to the GDG community by leveraging my passion for technology and strong desire to learn and implement innovative solutions. Eager to collaborate with like-minded peers and explore new advancements in the tech landscape.

MISCELLANEOUS EXPERIENCES

- **Dexter's Laboratory Event, GDG**
  - Achieved a top 5 position in this event, showcasing my problem-solving skills and ability to innovate under pressure.
- **Mentorship Roles**
  - Serving as a mentor for three sections in my college, where I guide students in their academic pursuits and help foster a collaborative learning environment.
- **Product Design Competition**
  - Contributed to a team that reached the finals, finishing among the top 5 teams. This experience enhanced my collaborative and design-thinking skills

TECHNICAL SKILLS

- Data Structures and Algorithms (DSA): Proficient in fundamental data structures (arrays, linked lists, trees) and algorithms (sorting, searching), with practical experience in problem-solving and competitive programming.
- Web Development: [HTML, CSS, React]
- Tools & Technologies: Basic knowledge of Kali Linux, Power BI and Figma.
